TECHNICAL DATA SHEET - FORKWELL

Textile mat suitable for shopping carts and forklift trucks.

The mat is an ideal solution for all buildings and halls where shopping carts and forklift trucks are used (department stores, logistics centres, construction facilities, forestry facilities, etc.). When entering the building, the mat removes dirt and moisture from the wheels of pallet trucks and prevents dirt from entering storage halls.

It is easy to install the mats in the standard size and extend them for your application.

Double-sided adhesive tape prevents the mat from moving on the floor (not included).

The polypropylene carpet is easy to clean and dries quickly.

The durable rubber underlay and upper layer made of polypropylene can withstand traffic of forklifts weighing up to 6000 kg.

Technical parameters

Size:	115 x 170 cm
Height:	6,3 mm
Material - surface:	dyed polypropylene
Material - base:	styrene-butadiene rubber
Weight:	5 kg/m²
Color:	black
Fire resistance:	test EN13501-1 (2007) + A1 (2009)
