TECHNICAL DATA SHEET - Coconut (natural)

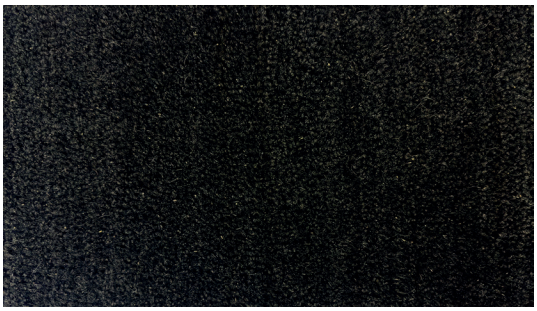

Coconut natural is a mat made of coconut fibers that absorbs moisture and scrapes away dirt. Ideal for use in light commercial areas where traffic is low.

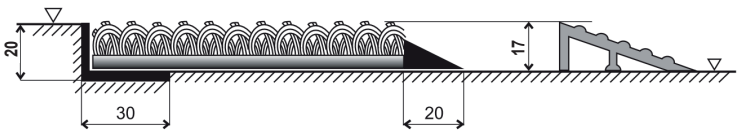

Thanks to its natural look and light shade, Coconut (natural) is a perfect fit for bright interiors. It is especially suitable for smaller entrance areas, such as in small offices, low-traffic commercial buildings, or residential spaces.

The mat is made from 100% natural coir fibre, which ensures a uniform, elegant appearance and excellent moisture absorption. We use only specially selected, lighter coir yarns that give the mat its typical natural tone, creating a warm and harmonious feel.

The main advantage of this mat is its soft, natural appearance, which looks subtle and clean. However, it is not suitable for high-traffic areas or environments with heavy loads.

Technical parameters

Dimensions:	according to customer's request (roll size 200 cm × 10 m)
Height:	17 mm
Material:	100 % coir yarn, PVC backing
Colors:	sand, black
Weight:	5.65 kg/m²
Installation:	at floor level in a prepared hole fitted with an aluminium frame 20 × 30 × 3 mm, or loosely laid on the ground with a 2 cm wide rubber strip or a 45 mm frame
Maintenance:	vacuum, shake out
