

TECHNICAL DATA SHEET - OKTAVA modules

These resistant rubber mats are intended for entrances, where they absorb the roughest dirt, mud and gravel. All are made of the finest rubber mixtures, to resist extreme climate conditions and maximum pedestrian frequency.

- Projections on the underside enable water to flow under the mat.
- Holes with diameter of 14mm are in compliance with EU standards for public entrances.
- Even surface ideal for riding over with shopping carts and wheelchairs.
- All sides of the mat have safety tapered edges.

Technical parameters

Dimensions:	70x90 cm 90x150 cm 120x180 cm
Weight:	10,3 kg/m ² 70x90 cm - 6 kg/modul 90x150 cm - 15 kg/modul 120x180 cm - 23 kg/modul
Height:	12.5 mm
Color:	black
