textile / grooved PVC x 2 / textile

The foundation of Topwell 22mm Wide mat are 41mm wide aluminium sections with grooved PVC or textile strips inserted. This type can be combined with Topwell 22mm Standard and Extra.

Grooved PVC and brush strips are used in the 1st cleaning zone to remove coarse dirt (stones, mud). Textile strips are used as 2nd cleaning zone for removing fine dirt (water, dust). Individual fillings can be replaced once they become worn.

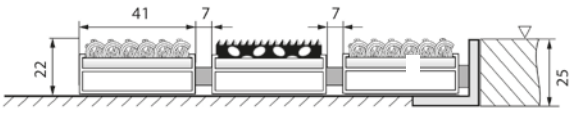

This type is intended for indoor use and may come with logo, which is inserted into individual aluminium sections. The logo can be supplied in textile or nop, according to our colour chart.

For practical reasons, we recommend using a single type of filling. Alternating PVC and textile fillings creates a height difference that may affect comfort when passing over the mat.

Alternatively, PVC filling can be used in the first half of the mat and textile filling in the second half. This allows the cleaning effect of both types of fillings to be utilized.

Fire-resistant version
Topwell 22 mm Wide mats can be used on escape routes with a fire-resistant infill and are certified according to EN 13501--1+A1:2010. Reaction to fire classification varies depending on the type of infill:

Grooved PVC: Bfl-s1
Textile strips: Bfl-s1
Brush strips: Cfl-s2

Technical data

Design:	grooved PVC, textile strips, can be combined with Topwell 22 Standard and Extra (single-row brush, brush strips)
Dimensions:	according to the client's requirements
Height:	22 mm
Weight:	15-17 kg / m²
Installation:	at floor level in 25 × 25 × 3 mm L-frame or freely placed on the floor with a 45mm (up to 120cm) or 65mm tapered aluminium frame
Resistence:	static load up to 7 t / 100 cm², not suitable for pallet trucks and forklift traffic
Use:	for very heavily frequented and heavily loaded entrances of shopping centers and department stores, for entrance areas of hotels, banks, restaurants, administrative buildings, as well as in front of family houses
